Coarse Angling Youth World Championship U15 | U20 | U25 01st to 06th August 2023 Rio Sorraia – Coruche – Portugal

The Portuguese Federation of Sport Fishing will be holding from August 3rd to 6th of this year, the Coarse Angling World Championships for Youth in the categories U15, U20 and U25.

The International Federation attributed the organization of this important Event to Portugal, a fact that greatly honours us and for which we are grateful for the trust placed in us once again.

The Portuguese Federation of Sport Fishing chose for this competition sceneries of rare beauty, situated in the province of Ribatejo, having the Sorraia River as reference and the town of Coruche as host of the biggest World event of the referred categories and this modality in 2023.

The dedication, commitment and passion that the Portuguese Federation, the Town Hall of Coruche and all the lovers of Coarse Angling in Portugal involved in the Organization will offer to whoever visits, will proportionate a memorable week of optimal stay and excellent World Championships.

It is in this sense, that I come in name of the Portuguese Federation of Sport Fishing and in my personal name, to invite you Mr President, and the Teams representative of your country, to participate in the 27th, 36th and 15th Coarse Angling World Championships for Youth.

We are waiting for you!

The President of F.P.P.D.

Carlos Baptista

Coarse Angling Youth World Championship U15 | U20 | U25 01st to 06th August 2023 Rio Sorraia – Coruche – Portugal

Dear Anglers and Participants,

It is with great satisfaction that we receive the Coarse Angling for Youth World Championship, on the 5th and 6th of August, in close collaboration with the Portuguese Federation of Sport Fishing in a synergy that this year completes 30 years in the organization of several National, European and World Championships. My grateful thanks to the Portuguese Federation of Sport Fishing and the International Federation for, once again, believing in Coruche and its municipality to hold such an important competition. A word of thanks also to the 1st Association of Sport Fishing and to our Coruche Sport Fishing for their commitment to ensuring that this championship takes place with all the dignity in Coruche, which knows how to receive so well.

We are all used to major competitions on the banks of our river, in the middle of the riverside area of Coruche, a magnificent space that also invites visitors, so I extend my invitation to all those who wish to follow this competition, who can discover the magnificent landscapes of the village, and participate in a set of activities that will take place over the next few days.

The richness of fish is known, which makes Coruche a privileged place for sport fishing, being considered one of the best fishing grounds in the world. The Sorraia River is home to a variety of species, including barbels, boops boops, carps, bleaks, mullets and carassius, having contributed to the development of artisanal river fishing throughout the area.

Once again, welcome to Coruche, to our fishing lane on the Sorraia River.

I would like to take this opportunity to wish all the participating teams and their anglers good luck in this Coarse Angling for Youth World Championship.

Francisco Silvestre Oliveira

Rio Sorraia - Coruche - Portugal

Competition Venue

The Sorraia River is born in the parish of Couço and results in the junction of the Sor and the Raia Streams. Is the Portuguese Tejo's affluent with the biggest hydrographic basin, with approximately 7730km², receiving various streams along its course.

This river has a vital role for the region, since the time the Romans and the Moors settled here, using the river for agriculture and communications purposes, to export products cultivated in the fertile lands of the Sorraia Valley, where they developed intricate irrigation systems that have been in use until our days.

Abound in the Sorraia River various species, namely barbells, boops boops, carps, ablets, mullets and carassius, having developed the artisanal fishing. This species richness has turned the Sorraia river into a privileged place for the practice of sportive fishing, being considered one of the best spots for national and international competitions.

ANTI-DOPING INFORMATION TUE REQUESTS

A Therapeutic Use Exemption (TUE) is a certificate granted by an anti-doping organization (IF for international-level athletes, NADO for national-level athletes and MEO for athlete participating in an MEO event). The certificate is for a set prohibited substance, in certain dosages, with a limited period of validity. An application for a TUE must be based on a documented medical condition and diagnosis and the TUE will only be granted under strict criteria laid out in the International Standard of TUEs.

Athletes must absolutely avoid taking a medication with a prohibited substance without a valid TUE.

The presence of a prohibited substance or its metabolites or markers in an athlete's sample without a valid TUE is an Anti-Doping Rule Violation (ADRV), as are the use or attempted use of a prohibited substance or a prohibited method, possession, administration or attempted administration.

Athletes must therefore consult the Prohibited List <https://www.wada-ama.org/en/resources/science-medicine/prohibited-list> with their prescribing physician before taking a medication to ensure that no prohibited substance is contained in the medication needed.

Athlete whose illness or condition requires treatment with a prohibited substance or method (listed in this link: <https://www.wada-ama.org/en/resources/science-medicine/prohibited-list>) must apply to CIPS for a TUE following the CIPS strict TUE application process. He shall then use the application form, which can be downloaded from the ITA website: <https://ita.sport/wp-content/uploads/2019/02/TUE-Form.pdf>

The TUE request has to be sent to the following address: tue@ita.sport

If the TUE is granted, the athlete will then be permitted to use the medication during the period of validity of the TUE without committing an Anti-Doping Rules Violation (ADRV).

Regardless of whether a TUE has been granted or not, athletes should always declare on the doping control forms filled out during sample collection any medications and supplements taken within the seven days prior to sample collection, and any blood transfusions in the three months prior for blood samples.

If a TUE has already been granted by a NADO or by a RADO, the Athlete in question does not have to apply for any additional CIPS TUE, as CIPS recognizes all TUE granted by NADOs and RADOs.
